

A large red dump truck is shown from a side-front angle, driving along a dirt road that cuts through a quarry site. The background features large piles of earth and rock, with some green vegetation and trees at the top of the hill. The lighting suggests it's either early morning or late afternoon.

VISION & MISSION

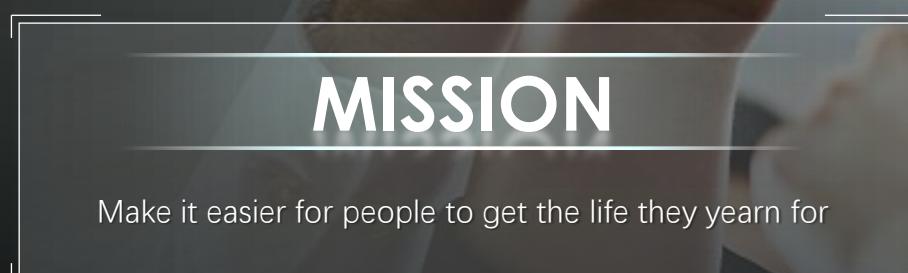

VISION

Become a smart solution expert for commercial vehicles

MISSION

Make it easier for people to get the life they yearn for

MEET OUR LEADER

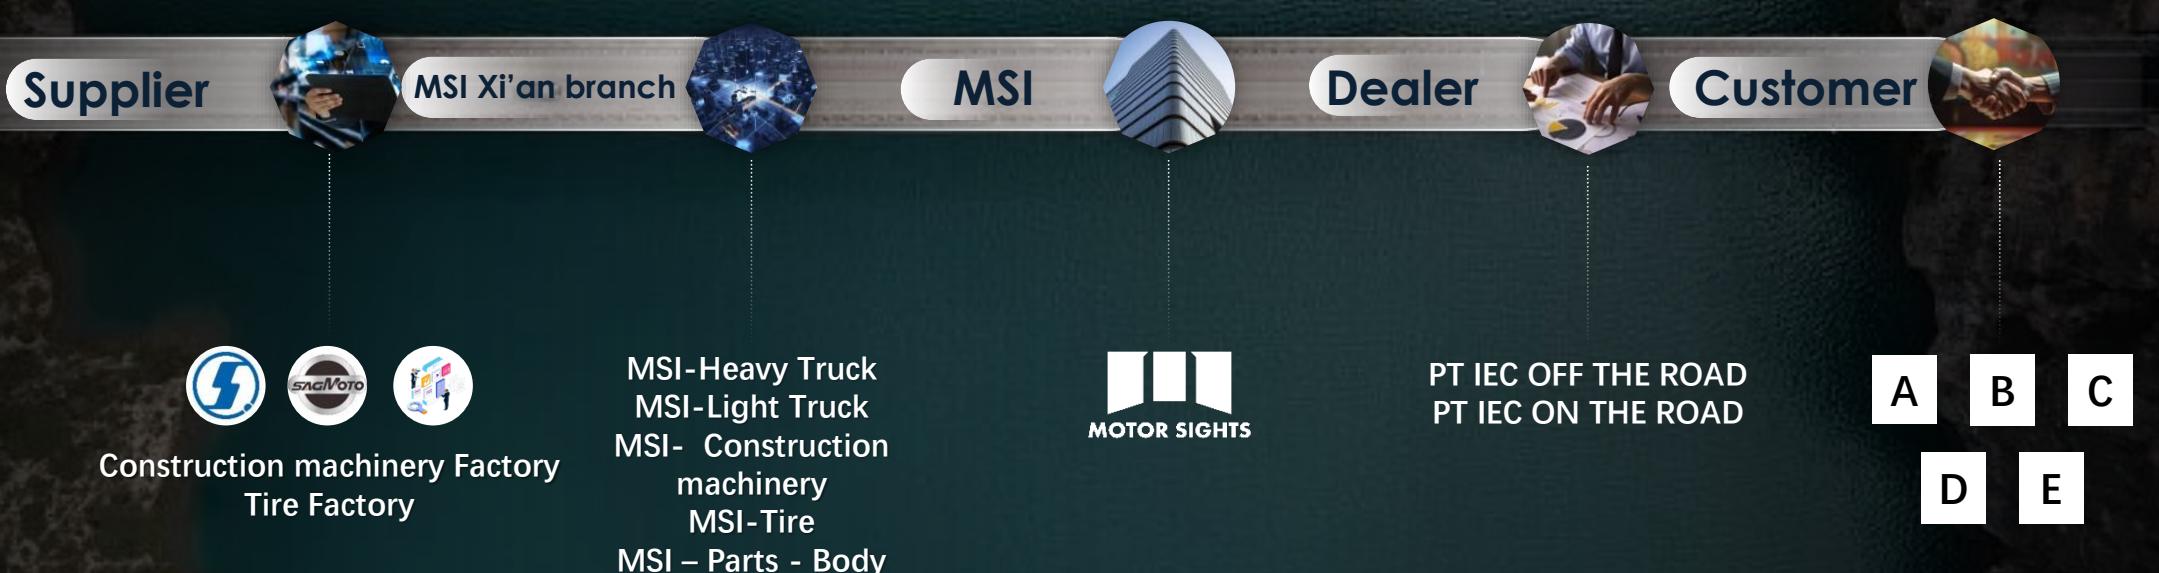

“ SARAH SHEN
President Director

Business Model

The development of the dealership concept is supported by a direct supply chain from the factory, ensuring a continuous supply of original and high quality products and spare parts.

Product introduction

MS600

Main configuration: Customized dump trucks can be customized based on standard configuration for different working conditions and specific environments such as road condition and reliability, can be fitted with tail warping, mining tires, rear steel plate thickening, oil bath air filtration, etc., to meet the personalized requirements of different working conditions.

MS700

The MS 700 series is developed and customized according to the characteristics of local working conditions in Indonesia. It features a fully upgraded driving platform and is equipped with a powerful Cummins engine. Additionally, the 12.00R24 tires greatly enhance the unit's ability to traverse terrain, enabling it to better adapt to the harsh working conditions in mining areas.
